

Precision Meets Efficiency - Unlock 25% Savings Today!

Revolutionize Your Lab with Microplate washers and readers from Agilent BioTek

Are you tired of tedious lab work, inconsistent results, and long hours spent on experiments?

For a limited time, you can revolutionize your lab while saving big!

Enjoy a 25% discount on 50TS Strip Plate Washer, Epoch2 UV/Vis Plate Reader and Synergy LX Multimode Reader.

Precision Meets Efficiency: Our cutting-edge technology ensures accurate and consistent results, saving you valuable time and resources.

Streamlined Workflow: The Epoch2/Synergy LX and 50TS work seamlessly together, streamlining your lab processes and reducing manual labor.

Intuitive Software: User-friendly software makes data analysis a breeze, even for beginners.

Versatility: Whether you're conducting ELISAs, cell-based assays, or nucleic acid quantification, these instruments adapt to your needs.

Reliability: Built to last, our instruments are designed with the highest quality standards, giving you peace of mind.

Enhance your microplate washing experience

- 50TS is a compact strip washer for microplates
- Color touchscreen makes creating protocols fast and intuitive
- Easy touch operation for washing full or partial plates

Discover the power with Epoch 2 UV-Vis Microplate Reader

- Supports reading of 6- to 384-well microplates
- Monochromator based absorbance for filter-free wavelength selection from 200 to 999 nm in 1 nm increments
- Unique 4-Zone incubation (RT to 65 °C) with anti-condensation mode providing consistent temperature across the whole plate

Read your microplates in any detection mode with Synergy LX Multimode Reader

- Supports reading of
- 6- to 384-well microplates
- Monochromator based absorbance for filter-free wavelength selection from 200 to 999 nm in 1 nm increments
- High performance, high-blocking filters for Fluorescence
- Advanced shaking profiles including linear, orbital and double orbital
