SEMINAR

Biomark HD - Discover the Possibilities

Improve your High Throughput PCR and qPCR with Standard BioTools microfluidic system available at NMBU.

In this seminar, you will get:

- An introduction to high throughput qPCR with your Biomark™ HD platform.
- Learn about a novel data-driven method to identify multiple targets in a single reaction, with extremely reliable and accurate results.
- Hear how this unique method provides a fast, accurate, and cost-effective approach to your Genotyping and Gene expression projects.
- Discover the new X9 High-Throughput Genomics System, the only system for qPCR and NGS library prep on the market.

Talks by
Elena Cerro Gálvez, PhD
Field Application
Specialist
Standard BioTools

Book your 1-to1's with Causia and Elena:

- to discuss further your qPCR next project
- to discuss further our D3 Assay design tool, to build your own panel
- to attend a personal workshop with your own data and get some tips & tricks about the Genotyping or Gene Expression software analysis to optimize your results
