AH diagnostics

Pipettes and Popular Centrifuges for Every Lab

Save 20% on Research plus, 5425 and 5810 centrifuges

- Research Plus pipettes are ultra-light and have excellent precision and accuracy
- Centrifuge 5425/5424R bundles perfect for modern biology applications
- Centrifuge 5810/5810R bundles for medium to high-throughput laboratories

Sequence the SMART Way!

AH diagnostics offers a broad NGS portfolio from Takara Bio.

Best-In-Class products that provide unmatched sensitivity and reproducibility for all of your demanding sequencing applications – regardless of sample type or input amount. You are always welcome to contact us if you need help to find the right kit for you

► Save 15% on selected NGS kits

634485-CLO	SMARTer® Stranded Total RNA-Seq Kit v3 - Pico Input Mammalian	24 rxns
635029-CLO	SMARTer® smRNA-Seq Kit for Illumina®	12 rxns
R400748-CLO	SMART-Seq® HT PLUS Kit	48 rxns
R400750-CLO	SMART-Seq® Single Cell PLUS Kit	48 rxns
R400752-CLO	SMART-Seq® v4 PLUS Kit	48 rxns
R400782-CLO	ThruPLEX® DNA-Seq HV PLUS Kit	24 rxns
R400784-CLO	ThruPLEX® Tag-Seq HV PLUS Kit	24 rxns
R400741-CLO	ThruPLEX® DNA-Seq HV	24 rxns
R400742-CLO	ThruPLEX® Tag-Seq HV	24 rxns
634442-CLO	SMART-Seq® Stranded Kit	12 rxns
634470-CLO	SMART-Seq® Single Cell Kit	12 rxns

Enhance Your Cell Separation

With this ready-to-use medium you will be able to rapidly recover viable lymphocytes and other PBMCs and BMMCs from small volumes of whole blood.

► Save 20% on Merck Histopaque

- Histopaque®-1077 - for separation of Mononuclear cells
- Histopaque®-1083 - a solution like Histopaque®-1077, adjusted to a density of 1.083
- Histopaque®-1119 - for double separation into granulocytes and other mononucleated cells

Please state campaign code when ordering: **CM00369**

The New Azure 280 is Now Even More Affordable

Alongside intuitive and upgraded software the aesthetically designed Azure 280 Imager comes with multiple types of imaging options including:

- Chemiluminescence detection
- Bioluminescence detection
- Visible marker imaging
- Color imaging
- Blue light imaging
- UV302/365 imaging

► Save 35% on the Azure 280 imager with 1 extra year of warranty and 4 software licenses

Save 35%

Essential Consumables for PCR Labs

ClearLine Microplate Centrifuge (62583CL)

Allows to rapidly spin down droplets in microplates to improve PCR yields or give more consistent assay results.

- Accepts most types of plates, microplates, and deepwell plates*
- Unique swing-out rotor design prevents spillage
- 5 years warranty

► **Save 20% on ClearLine 96 well-plates and plate centrifuge**

*Rotor for deep well plates- must be purchased separately. Please state campaign code when ordering: **CM00367**

ClearLine PCR plates (257047, 257048, 257049, 257050)

- DNase RNase free, pyrogene free, PCR inhibitor free
- Choose from non skirted, skirted, or half skirted
- Short delivery time

The New Standard in Immune Profiling

The Maxpar® Direct™ Immune Profiling System is a sample-to-answer solution for high-dimensional immune profiling of human PBMC and whole blood. Expansion panel available for Myeloid and B-cell, NK Cells, and T-cells.

- **Comprehensive:** Profile 37 immune cell populations with optimized 30-marker panel.
- **Flexible:** Possible to add a validated 6- or 7-markers expansion panel for even deeper insight.
- **Efficient:** Simple single-tube workflow with pushbutton reporting. Just add sample and go.
- **Reliable:** Produce consistent results with lot-to-lot, run-to-run and site-to-site.

► **Save 30% when buying both a Maxpar® Direct™ Immune Profiling Assay™ (201325-dvs) and a 6 or 7-markers expansion panel.**

Offer is valid when ordering by email or telephone only!

FLUIDIGM

RayBiotech Testing Services for Multiplexing Protein Detection

Measure the levels of hundreds of proteins from a single sample, with RayBiotech's quantitative/semi-quantitative antibody array platforms.

Let the experts at RayBiotech do the assay for you, send your samples, and we'll send you results! **Contact us to get a quote or hear more about this service.**

► **Save 50% on high-density sandwich-based proteomics services**
